## Instructions for using **new and improved** *Marrs Mutes™*

1. The mutes are numbered and graduated in sizes proportional to 32", 29", 26", and 23" timpani. Use the longest (#1) mute for the 32" etc.
2. With label side facing out, attach the mute to the rim in its vertical position where you will be able to reach it with your mallet. I like to use the placement in the following diagram since it keeps the mutes out of the way yet they are still easy to reach with the stick.

3. Flip the mute to the "down" position to ensure it lies flat on the head. You may need to adjust the position of the magnets on the rim slightly up or down.
4. To apply the mute, simply tap it with your mallet and it quietly falls into place on the head, giving you equal muting for each drum.
5. When you reset it to the vertical position, a second magnet holds it upright until you are ready to flip it down again.
